

Vertical Blinds

sunway.

Engineered for style
& functionality

Sunway Vertical Blinds offer a superior level of style & performance.

Smooth & Quiet Operation

Noisy and clunky operation is eliminated with Sunway Vertical Blinds. The traversing wand gear has been specially designed to provide ultra-smooth operation.

Robust Traveller Hooks

Made from a virtually unbreakable transparent thermoplastic featuring a spring-less clutch function with stabilising arm, keeping hooks secure within the track.

Rigorous Testing

All components have been cycle tested to last up to 10 years. Endcaps, drive chain, travellers and end retainers are forged from Polycetal, a highly engineered thermoplastic for precision and stability.

Easy Installation

Tracks are universal making it much easier to install, including flipping on site if the control side needs to change. Blinds install into clip-in brackets allowing for simple removal if needed.

In-built clutch function in the wand hook to prevent breakages under force.

Robust Traveller Hooks

Superior performance with a heavy duty chain & thick cord.

Traversing Wand

With wireless weights the traversing wand offers a child safe solution. Glide the wand across the track to open or close the blind, or spin the wand to tilt the louvres.

- Wand can be hidden behind the blades.
- Split stack options with a single wand.

Chain & Cord

Conventional operation with a beaded chain to tilt the louvres and a cord to open & close the blind.

Colour Coordination

Componentry, including cord, wand & handle, gears and end-caps, have been designed to blend seamlessly with headrails and coordinate with vertical fabrics.

Contemporary headrail with subtle curved surfaces & colours inspired by Australian home interior trends.

UV resistant aluminium wand with colour coordinated hook & handle.
